EXPERIENCE

Whole Foods Market

Austin, Texas

Business Intelligence Engineer

September 2017 – July 2019

- Designed, developed, and tested enterprise grade data warehouse tables/views, Tableau dashboards; worked with diverse stakeholders to integrate and report on data from numerous sources (including XML, AWS S3, Teradata, Oracle, Microstrategy reports, and Excel); integrated complex business logic into data pipelines and visualizations
- Planned and delivered a variety of analytics enablement initiatives (trainings, office hours, shared enterprise data sources) in my role as resident Tableau and proprietary data subject matter expert; helped grow Tableau from proof of concept to mission-critical application accessed daily by more than 200 developer users and thousands of business users (store leadership, finance, supply chain, e-commerce, HR, marketing)

Downtown Austin Alliance

Austin, Texas

GIS/Project Management Intern

January 2017 – June 2017

- Worked with analytics staff, urban planners, and economic development experts to create and action on a process for field-based economic data collection in Downtown Austin using ArcGIS Collector (and display in ArcGIS Online)
- Developed maps to sharing analysis of urban core first-floor retail and business use with the City of Austin

Texas General Land Office

Austin, Texas

GIS Intern, Coastal Resources Program

January 2017 – June 2017

- Developed GIS data and cartographic products in support of Texas' coastal resource management programs
- Georeferenced, edited, and updated spatial data features using original engineering documents, construction plans, project/grant proposals and descriptions; prepared and loaded data to enterprise geodatabases

Sanger Learning Center, UT-Austin

Austin, Texas

Supplemental Instruction Leader, Economic Statistics/Microeconomics

August 2015 – December 2016

- Develop lesson plans and problem sets; lead an average of 40 students twice weekly in sessions designed to provide additional practice on concepts covered in class and to encourage high quality study skill
- Participated in ongoing pedagogy trainings and peer review to continually grow teaching skills

Tableau Software

Austin, Texas

Product Consulting Intern

June 2015 – August 2015

- Developed a deep proficiency with Tableau Desktop; learned the tremendous communicative and analytic capabilities of data visualization to better understand and verbalize the value proposition of Tableau
- Prepared for and delivered multiple internship products in just 8 weeks, including delivering multiple live product demos and trainings for up to 200 people, and the creation of a data-driven Tableau visualization aimed at contextualizing and visualizing the risks and impacts of the severe 2015 drought in California
